#### ERBA VITA GROUP S.p.A.

Via dei Faggi, 26 - 47894 Chiesanuova Repubblica di San Marino

# LICOPROST

## Effective, clinically proven ingredients

Based on Serenoa repens, Pumpkin, Pomegranate, Lycopene

A natural aid for the physiological health of the male urogenital system.

Regulates disorders of the prostate and the urogenital system.

Helps to alleviate urinary tract irritation

Antioxidant action.

Quality, Efficacy, Guarantee.

Think Green. Live Green. Be Green.

## LICOPROST

### Product based on high-titre extracts.

## Efficacy widely demonstrated by in vivo and in vitro clinical studies.

- Adjuvant properties for disorders associated with prostatic hypertrophy.
- Physiologically restores function of the urogenital system.
- Protective and antioxidant properties.
- Tonic effect on vesicle muscle.
- Normalizes urinary impulse.

Packaging: blister pack of 60 capsules weighing 500 mg. each

The recommended dosage is 2 capsules per day.

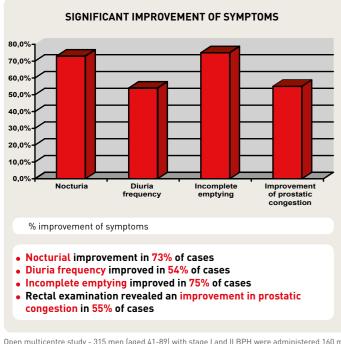

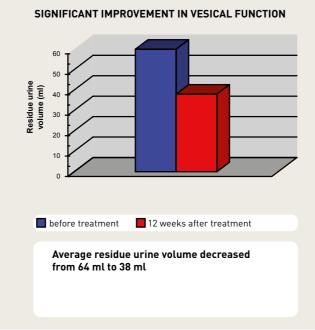

**ZINC** 

#### **SAW PALMETTO** (Serenoa repens fruit)

DRY EXTRACT STANDARDIZED 40% FATTY ACIDS

The extract from saw palmetto berries contains free fatty acids, starch, polysaccharides and other components, which by working synergistically on the 5a-reductase enzyme, are capable of preventing excess testosterone from converting to DHT (dihydrotestosterone - a molecule responsible for prostate enlargement) and DHT from binding to androgen prostate receptors.

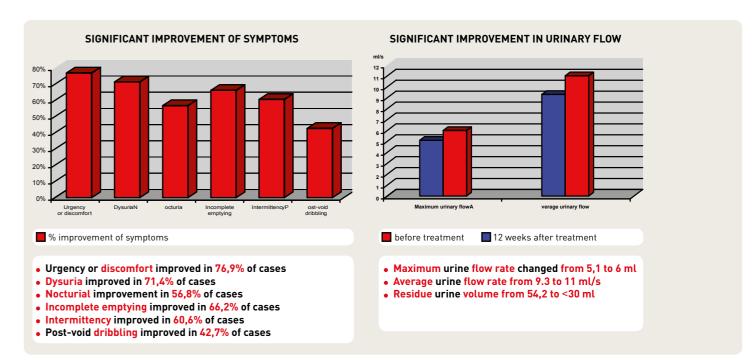

Open multicentre study - 315 men (aged 41-89) with stage I and II BPH were administered 160 mg dosages twice per day

The role of Lycopene is to handle oxidative stress, commonly found in prostate pathologies, by trapping free radicals and consequently inhibiting DNA oxidation (that causes cell modication) and lipid peroxidation.

#### **GRAMINEX**

GRAMINEX is a completely natural and allergen-free ower pollen extract obtained by a special process that enables the selection of specic plant species after meticulously testing their suitability. Studies performed for over 20 years in Universities and hospitals have demonstrated the true ecacy of pollen extract in patients with prostate infections (benign prostatic hypertrophy, a-bacterial prostatitis and pyospermia).

Graminex helps to restore physiological prostate health and simultaneously eases its symptoms due to the combined action of antioxidant substances.

Symptom improvement percentage in 79 male patients aged 62-89 years with an average basic prostate volume of 33.2 cm3 following administration of 60 mg doses of extract, twice per day for 12 weeks

#### **BEARBERRY** (Arctostaphylos uva ursi leaves)

DRY EXTRACT STANDARDIZED 20% ARBUTIN

Bearberry is known as one of the most eective remedies for urinary tract infection. The antiseptic properties of Bearberry can be helpful for prostatic hypertrophy linked to bacterial infection.

#### PUMPKIN (Cucurbita pepo seed)

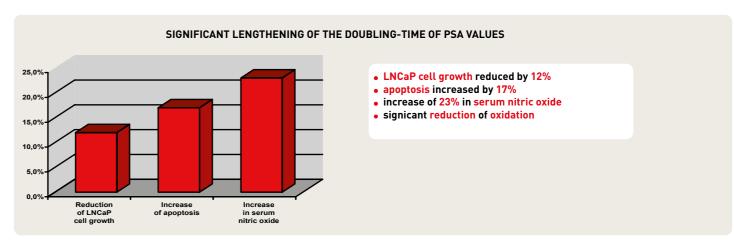

DRY EXTRACT STANDARDIZED 40% FATTY ACIDS AND 0.075% PHYTOSTEROLS

The antagonist eect on dihydroxytestosterone receptors of delta-7-phytosterols contained in this drug is such to produce an inhibitory eect.

#### POMEGRANATE (Punica granatum fruit)

DRY EXTRACT STANDARDIZED 40% ELLAGIC ACID

Recent studies have attributed the pomegranate with many properties, essentially related to the potent antioxidant eects of ellagic acids. The following are among the most important: preventive action against the onset of arteriosclerosis, antibacterial activity (proven eect on helicobacter pylori bacterium) and protection against DNA damage. The ecacy of this extract in reducing PSA (Prostate-Specic Antigen) levels has been conrmed in recent studies.

The PSA levels of patients were >0.2 and < 5 ng/ml with a Gleason score less or equal to 7. Subsequent to treatment, the average doubling time of PSA levels increased considerably from a basal average

Zinc has immune-modulatory and antioxidant eects. From a physiological standpoint, zinc is essential for growth and development, sexual maturity and reproduction and for a series of immune-related reactions. It consequently acts to increase fertility and to regulate the immune system. Zinc supplementation can be useful for dierent conditions including oligo-spermia and for certain types of inammation precisely such as prostatitis.
